***Election/Restriction***

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

Group I: Claims 1-13, 15-17 and 19-28, drawn to the products such as a combination of two or more packages juxtaposed to form a unit, classified in Class 206, subclass 497 and others.

Group II: Claims 14, 18, 29 and 30, drawn to a process for shipping two or more packages juxtaposed to form a unit, classified in Class 53, subclass unknown.

The inventions are distinct, each from the other because of the following reasons:

Inventions [II] and [I] are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as by providing one of the films is opaque and the other is translucent or the unit is shipped with the translucent film side as the top side of the combined packages to allow visual access to the packages.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because by their different classification and because they are capable of separate manufacture, use and sale, restriction for examination purposes as indicated is proper.
